

LevMix 65

mobile mixer

Mix and pour compounds for perfect results

One man operation:
mixing, transporting, pouring out

To pour the material accurately
on the floor

Consistently superb and
reproducible mixing results

Mixing of levelling compounds fast and easy with the LevMix 65 mobile mixer. Save time and mix three bags plus at once.

Technical specifications

Mixing volume	15 gal / 3 bags plus
Max. load	220 lbs
Power rating	1600 watts / 2.15 hp / 14.5 amps
Speed	660 rpm (without load) 410 rpm (under load)
Weight, empty	93 lbs
Dimensions	27.2 x 20.5 x 46.9 in
Mixing paddle	VLX 160 HF
Item number	37101

Ideal for mixing: Cementitious levelling compounds, sealants, floating screeds, textured coatings, adhesives, overlays, underlays, resins, epoxies, fiber-reinforced filler compounds, etc

LevMix 65

mobile mixer

1 Mixing

2 Transporting

3 Pouring out

Getting jobs done more quickly - with up to 50% less effort.

Opening

Cover with various detent positions for safe lowering

Powerful drive unit

1.6 kW motor for reliable and long-lasting operation

Safety switch

Switching the mixer on and off; undervoltage release

Handle bar

For guiding and pouring safely

Compact dimensions

Easy to maneuver and pour

Maximum mobility

With 4 steering rollers for moving in all directions; pour and move in one go

Mixing paddle

Mixes with high shear force, prevents the formation of lumps and residual of material at the bottom and on the side.

Dust collection

Dust free operation with practical connection for the vacuum cleaner. Half bucket cover reduces considerably the dust emission

Quick-release coupling

No additional tools needed for fitting and removing the paddle

Mixing bucket

Suitable for max. 3 sacks/ 15 gal. Thick-walled bucket material with pouring device: Standard bucket, not a special shape

Footer lever

Foot-operated, safe release of the mixing bucket
